VISOKA ŠKOLA STRUKOVNIH STUDIJA ZA INFORMACIONE I KOMUNIKACIONE TEHNOLOGIJE

Dokumentacija

Web programiranje 2

Lena Mijalković 52/22

Korišćeni alati

Za izradu sajta su korišćeni HTML, CSS, Bootstrap, JS, jQuery biblioteka, JSON

Radno okruženje: Visual Studio Code

Template

Za izradu sajta je korišćen gotov template

Funkcionalnosti

Dinamički ispisan navigacioni meni iz JSON-a u header-u i footer-u stranice uz pomoću AJAX-a.

U navigaciji se vidi i broj proizvoda u korpi.

Na index stranici u sekciji „featured products “, prikazani su samo proizvodi koji su označeni kao najprodavaniji u JSON–u.

Urađen try/catch na nekoliko mesta u kodu u slučaju greške.

Dinamički ispisane kategorije na index stranici. Kada se klikne na jednu od njih, odlazi se na shop stranicu gde se prikazuju svi proizvodi.

Za svaki proizvod na shop stranici su dinamicki prikazani podaci obračun cene, takođe sa “new” su označeni samo određeni proizvodi.

Za proizvode kojih ima manje od tri na stanju se ispisuje poruka “Only a few left!”

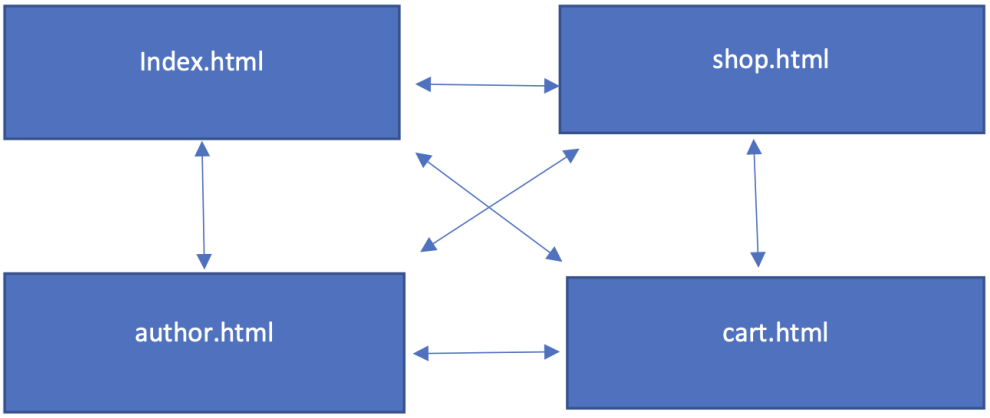
Na shop stranici je urađeno sortiranje, filtriranje, dodavanje proizvoda u korpu.

Za korpu je korišćen Local Storage. U korpi se nalaze podaci o ubačenim proizvodima, dugme za brisanje proizvoda iz korpe i povećavanje količine. Takođe se nalaze i podaci o ukupnoj ceni bez poštarine, poštarina i na kraju ukupna cena.

Validacija forme, ako nisu ispravno popunjeni podaci prikazuju se greške, a ako su pravilno popunjeni prikazuje se toast u donjem desnom uglu da je uspešno poručeno, nakon čega se brišu proizvodi iz Local Storage-a.

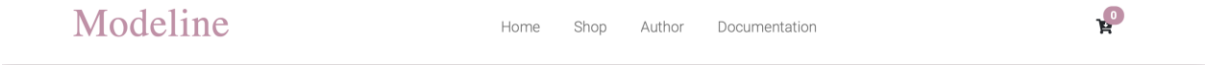
Rad sa datumom se realizuje kod dropdown liste za sortiranje ciji je to jedan od kriterijuma za prikaz od najnovijih do najstarijih proizvoda i obrnuto.

Organizaciona šema

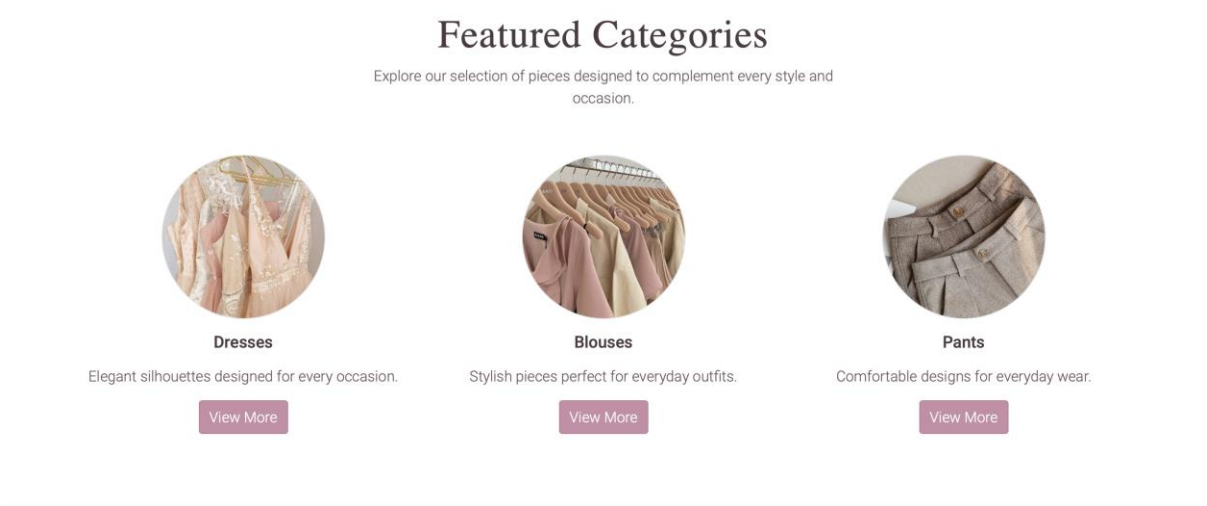


U navigacionom meniju se nalaze stranice index, shop, author i cart.

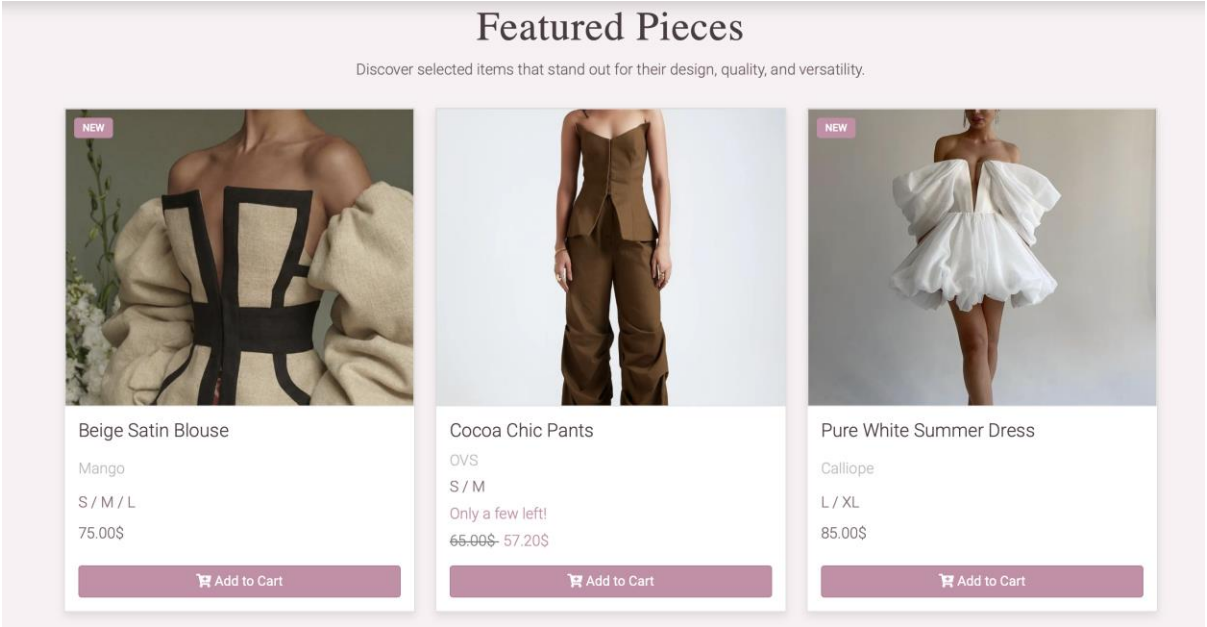
Svaka stranica ima pristup cart.html-u dok samo cart.html može pristupiti checkout.html-u



Navigacija je ispisana dinamiski iz JSON-a, cart ikonica predstavlja broj proizvoda koji su trenutno u korpi. Kada se klikne na kart otvara se stranica cart.html.

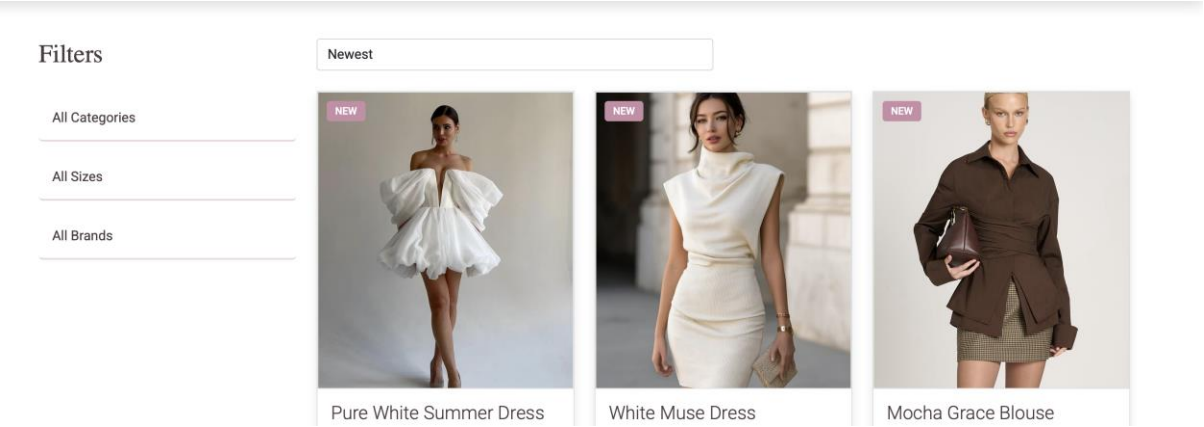


Dinamicki ispisano iz JSON-a za kategorije i klikom na bilo koju kategoriju tj view more vodi nas na stranicu shop.html na kojoj se nalaze svi proizvodi.



Dinamički ispisani proizvodi korišćenjem funkcije za ispis svih proizvoda samo što ovde imamo uslov da se prikažu samo proizvodi koji su označeni kao najprodavaniji.

U footer-u ispisani linkovi takođe dinamički.



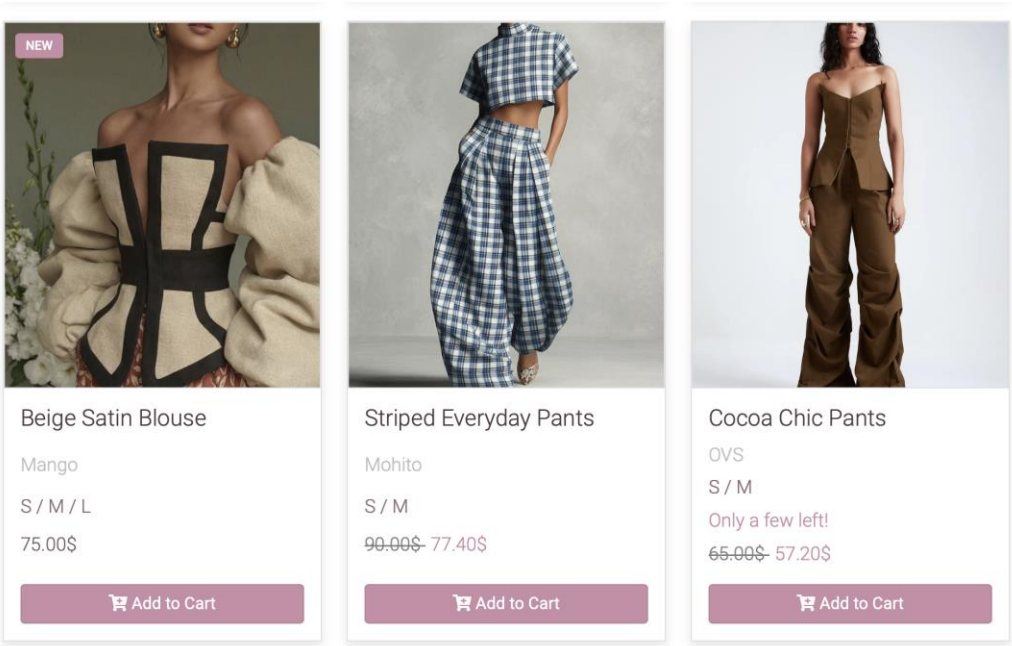
Filters deo predstavlja tri dinamički ispisane dropdown liste koje koriste istu funkciju za ispis. Poseduju tri kriterijuma za filtriranje po kategoriji, veličini i brendu.

Kategorije – haljine, bluze, pantalone

Brend – sastoji se od šest različitih brendova

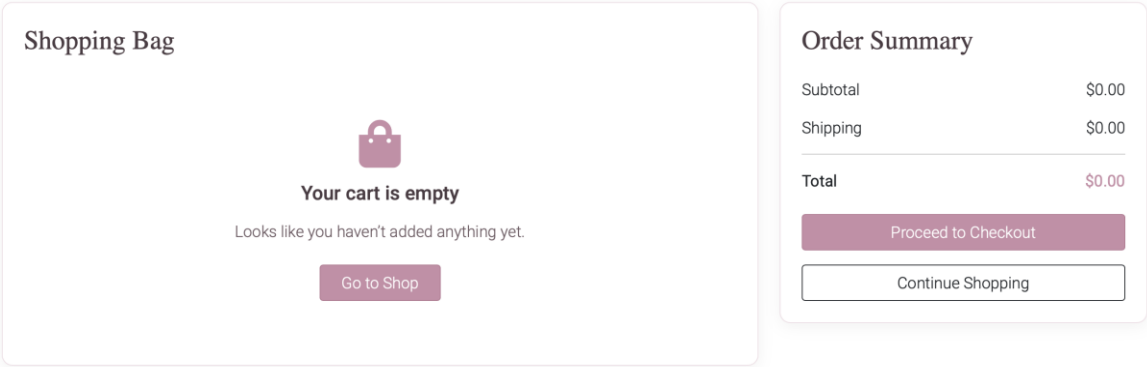
Veličine - od XS do L

Dropdown za Sort poseduje više različitih kriterijuma za sortiranje, po ceni rastuće i opadajuće, po nazivu takođe opadajuće i rastuće i po datumu, kao što možemo videti na slici prikazuju se prvo proizvodi koji su najnoviji, takođe može i obrnuto od najstarijih ka najnovijim.

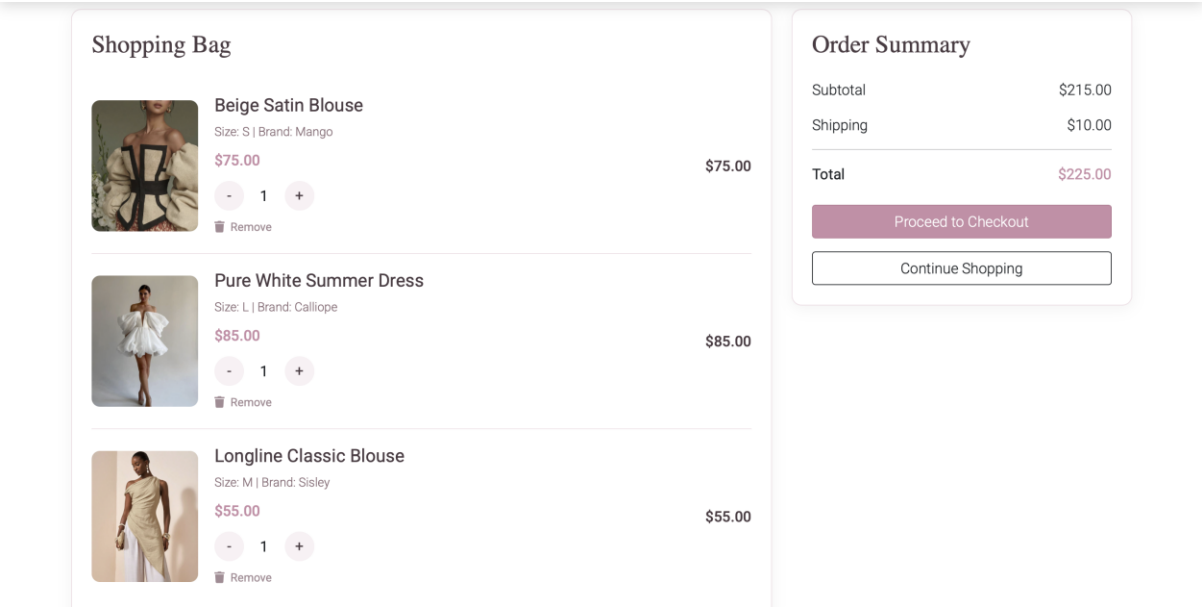


Svaki proizvod opisan je nazivom, brendom, dostupnim veličinama i cenom.

Određeni proizvodi su označeni kao novi, dok drugi mogu sadržati oznaku da ih je ostalo još samo par ukoliko obračunamo da je u zbiru svih veličina ostalo manje od tri proizvoda na stanju.

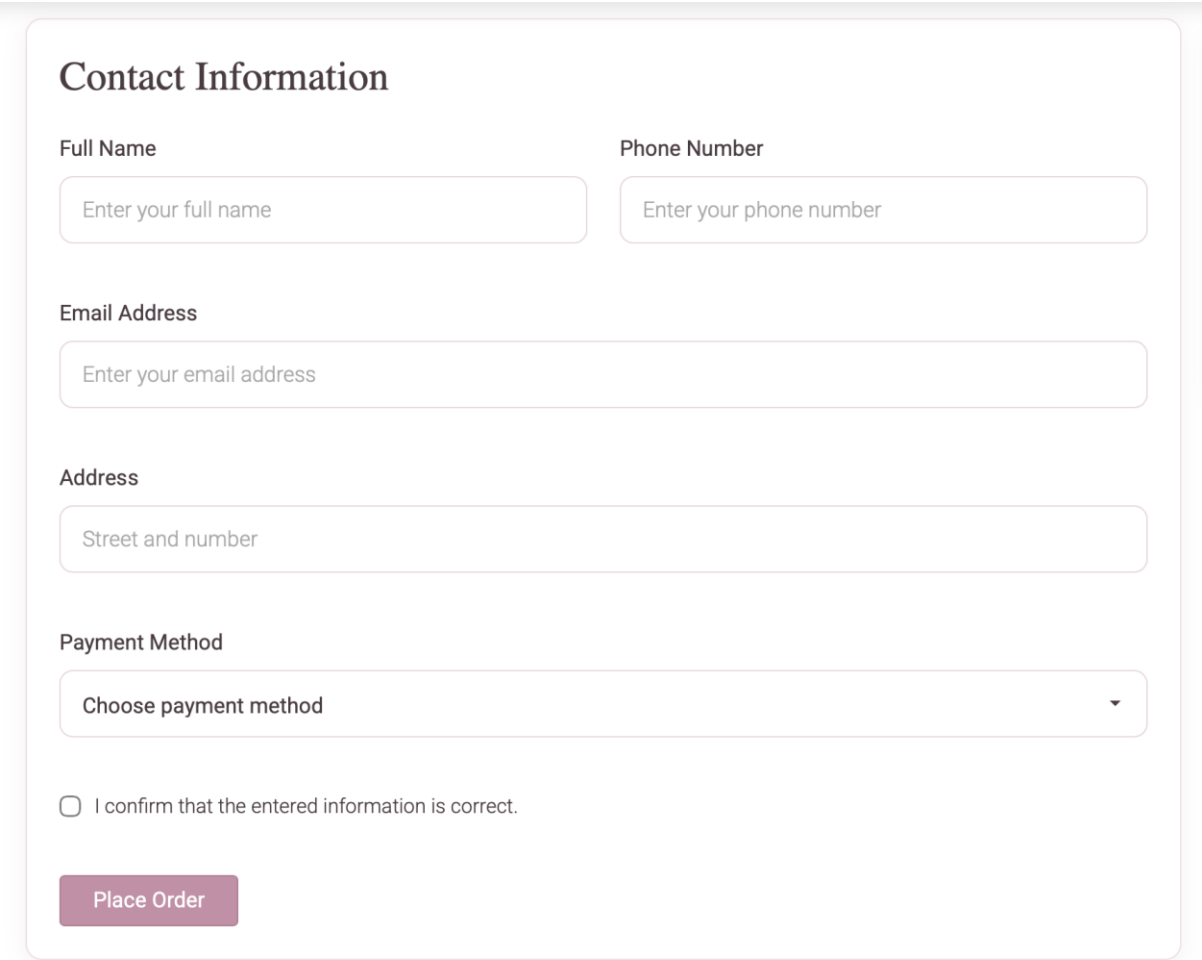


Stranica cart.html dok nema proizvode prikazuje se poruka „ Your cart is empty”.



Kada se proizvodi dodaju u korpu imamo opcije za dodavanje istog proizvoda klikom na + i smanjivanje količine istog proizvoda klikom na - . Opcija remove uklanja proizvod iz korpe. Sa desne strane nam se prikazuje cena, poštarina, kao i ukupna cena.

Klikom na Proceed to Checkout otvara se stranica contact.html na kojoj se nalazi forma.



Ukoliko polja nisu ispravno popunjena ispisivanje grešaka realizuje se preko try i catch blokova.

Poruka o uspešnosti se ispisuje u donjem desnom uglu i nakon toga se korpa briše.
